ANALYST COMMENTS

Blue lyophilized powder, black-cap vial, received sealed. Only GHK-Cu was found. BPC-157, TB-500 (full-length and fragment) and KPV were not detected (detection limit about 0.1 mg per vial). The dashed trace is a KLOW reference run on the same method, marking where KPV elutes. BPC-157 and TB-500 were checked on a second HPLC-UV method; that chromatogram is shown beside it.
